

Communication that makes sense

November 28, 2005

Federal Communications Commission  
445 12<sup>th</sup> Street SW  
Washington, DC 20554

RE: WC Docket 05-196

## Compliance Letter

Per the Federal Communications Commission (FCC) and its Enforcement Bureau's guidance, NetLogic is providing this Compliance Report. We are addressing point by point the items required by the commission:

**1. 911 Solution:** NetLogic has provided to each subscriber, existing and new, a letter describing the circumstances under which E911 services will not be available. NetLogic is providing E911 service to 100% of its retail customers.

NetLogic is a reseller of Level(3) VoIP services, and has no PSTN interconnections of its own. NetLogic is relying upon Level(3) Communications for all E911 services. As far as detailed technical specifications are concerned regarding Connectivity, Transmission of ANI and Registered Location Information, and Coverage, please see Level(3)'s filing for this information. NetLogic is transmitting all required information to Level(3), and all of NetLogic's testing has shown complete E911 information reaching the proper answering point.

**2. Initial Registered Location Information:** NetLogic's retail customers are businesses, and NetLogic installs an Integrated Access Device (IAD) and T-1 or greater services to all retail customers. The IAD is permanently installed on site, and will not work if moved to another location. As a result of this design, NetLogic obtains accurate location information from each customer before installation of services.

**3. Updated Registered Location Information:** Moving NetLogic services requires a move of T-1 and related connections, and is not possible without a NetLogic technician's involvement.

**4. Nomadic Subscribers:** NetLogic has no nomadic subscribers.

1000 Lake St. Louis Blvd., Suite 100, Lake St. Louis, MO 63367

<http://www.netlogic.net>

As of October 15, 2005, NetLogic began requiring new retail subscribers to be physically located within Level(3)'s E911 footprint. Currently, NetLogic does not accept retail customers from outside Level(3)'s E911 coverage area, nor does NetLogic direct any marketing efforts toward areas that E911 coverage is not currently available.

Sincerely,

Michael S. Young  
Executive Vice President – Operations  
NetLogic Inc.
